Syn. — Hypothesis, speculation — THEORY, HYPOTHESIS The following statement of the difference between a *theory* and an *hypothesis*, is derived from the writings of De Quincey With some slight variation, it is given in his own words "A *theory* may be thus described Imagine, in any science or speculation, that all the elements (that is, the forces, the modes of action, the phenomena, &c) are given, but as yet they exist to the mind as an unorganized chaos Then steps in contemplation, or reflective survey (Θεωρία), to assign to them all their several places or relations which shall be first, which middle, which last, which shall be end, which shall be means; which subordinate, which co-ordinate, which force is for impulse, which for regulation, which absolute, which conditional; which purpose direct, which indirect or collateral, and so on. This introduction of organization among the facts or data of science is *theory* A *theory*, therefore, may be defined an organic development to the understanding of the relations between the parts of any systematic whole In an *hypothesis*, on the other hand, it is only one relation which is investigated, viz, that of *dependency* A number of phenomena are given, and perhaps with no want of orderly relation among them, but as yet they exist without apparent basis or support The question, therefore, is concerning a sufficient ground or cause to account for them I therefore step in, and *underlay* the phenomena with a substructure, or *sub-position* (ὑπόθεσις), such as I think capable of *supporting* them This is an *hypothesis* Briefly, then, in a *theory*, I organize what is certain enough already, but undetermined in its relations, whereas, in an *hypothesis*, I assign the causality, when previously it was either unknown or uncertain For example, we talk properly of a *theory* of combustion, for the elements, that is, the phenomena and results, are indeterminate only with regard to their reciprocal relations But with regard to the aurora borealis, it is an *hypothesis* that we want in the first place, for the phenomena are of uncertain origin And perhaps this *hypothesis* would demand, as its sequel, a *theory* of the whole agencies concerned, but this could not be until the causality should have been determined Again, suppose the case of algebraical equations here all possibility of *hypothesis* is excluded But a *theory* is still wanted Many *theories* have started from the genesis of equations first proposed by Harriot viz, that which views the higher equations as generated by multiplication out of the lower But perhaps, a different view of their origin would lead to more comprehensive results Hindenburg, with his disciples Stahl &c, have most happily applied an approved *theory* of combinations to this subject

1 The preposition *to* primarily indicates approach and arrival, motion made in the direction of a place or thing and attaining it, access, and, also, motion or tendency without arrival, movement toward it is opposed to *from*, and, in most of its uses, is interchangeable with *unto*.

Stay with us, go not *to* Wittenberg *Shak*
So *to* the sylvan lodge
They came, that like Pomona's arbor smiled *Milton*
I'll *to* him again, he'll tell me all his purpose *Shak*
She stretched her arms *to* Heaven *Dryden*

2 Hence, it indicates motion, course, or tendency toward a time, a state or condition, an aim, or any thing capable of being regarded as a limit to move ment or action, as, he is going *to* a trade, he is rising *to* wealth and honor

3 Hence, further, in a very general way, and with innumerable varieties of application, it connects transitive verbs with their remoter or indirect object, and adjectives, nouns, and neuter or passive verbs with a following noun which limits their action its sphere verges upon that of *for*, but it contains less the idea of design or appropriation, as, these remarks were addressed *to* a large audience, let us keep this seat *to* ourselves, a substance sweet *to* the taste, an event painful *to* the mind, duty *to* God, and *to* our parents, a dislike *to* spiritous liquors "Marks and points out each man of us *to* slaughter" *B Jonson*

Go buckle *to* the law *Dryden*

4 As sign of the infinitive, *to* had originally the use last defined, governing the infinitive as a verbal noun, and connecting it as indirect object with a preceding verb or adjective, thus, ready *to* go, i e, ready unto going, good *to* eat, i e, good for eating, I do my utmost *to* lead my life pleasantly, i e, unto the leading my life pleasantly But it has come to be the almost constant prefix to the infinitive, even in situations where it has no prepositional meaning, as where the infinitive is direct object or subject thus, I love *to* learn, i e, I love learning, *to* die for one's country is noble, i e, the dying for one's country Where the infinitive denotes the design or purpose, good usage once allowed the prefixion of *for* to the *to*, as, what went ye out *for to* see? but this is now indelegant and vulgar In colloquial usage, especially in the United States, *to* often stands for and supplies an infinitive already mentioned thus, he commands me *to* go with him, but I do not wish *to*

5 In many phrases, and in connection with many other words, *to* has a pregnant meaning, or is used elliptically thus it denotes or implies, (*a*) Extent, limit, degree of comprehension, inclusion as far as, as, they met us *to* the number of three hundred "Few of the Esquimaux can count *to* ten" *Quart Review.*

☞ This word is sometimes pronounced *tran-zish'un*, but, according to Walker, Smart and most other authorities, the customary and preferable pronunciation is *tran-sish'un* It is true that this latter mode violates analogy, —*t* followed by any one of the vowels *a*, *e*, and *o*, and preceded by an accented syllable not ending in *s* or *r* having properly the sound of *sh* and not of *zh*, — but the irregularity is sought to be justified on the ground that the ear unconsciously predetermines that since the second syllable began with the surd consonant *s*, it ought for the sake of variety, to end with a consonant of a different kind Many speakers, however, avoid the unpleasant sequence of the surd sibilants *s* and *sh* by making the former sonant, and not the latter, saying *tran-zish'un* instead of *tran sish'un* and this practice seems worthy of encouragement as tending to reduce the number of anomalies in the almost impracticable orthoepy of our mother-tongue

Un. [A-S *un*, and sometimes *on*, O Sax, Goth, O & N H Ger *un*, O Frus *un, on*, D *on*, Icel *ó*, equivalent to *on*, Sw *o*, Dan *u*, allied to Gr *ἀ, ἀν*, Skr *an, a*, Celtic *an*, Lat *in*] A negative prefix of Anglo Saxon origin, equivalent to the Latin prefix *in*. The latter, in its English use, is restricted to words directly or indirectly derived from the Latin, and for the most part to representatives or derivatives of words which have the same prefix in the Latin or French, or else to words formed by Latin suffixes, and closely conformed to Latin analogue *un* is of much wider application, and may be attached at will to almost any English adjective, or participle used adjectively, from which it may be desired to form a corresponding negative adjective, while it is also prefixed to less numerous classes of nouns and verbs Its uses may be classified as follows —

I It is prefixed to adjectives, or to words used adjectively, as, (*a*) To adjectives to denote the absence of the quality designated by the adjective, as, *unaccordant, unafraid, unalterable un-American unambitious, unangular unanxious unapproachable, unapproachable unartificial, unattainable unbearable, unbeautiful, unbrotherly, uncandid, uncanonical, unchangeable, uncheerful uncivic, unclassical uncomic, uncommercial, uncongenial, uncordial, uncourtly undefinable undemocratic, undesirable undesirous, undistinguishable unlawful uncarved, unendurable, unEnglish unenviable, uneventful unexact, unfamiliar unfictitious, unfraternal, ungrammatical, unhandsome, unfraternal ungenial unhearted ungentle unhospitable, unhumanly unmanageable unmeet, unmelodious unmaid unmaidenly unmotherly, unmusical, unneedful, unnoble unobservant unornamental unpardonable, unpatriotic unphilanthropic, unphilosophic, unpoetic, unpronounceable unquenchable unrational, unremunerative, unrestful unromantic, unsalable, unsatisfactory, unscholarly, unscientific, unselfish unsympathetic, unsubstantial, unsuspicious, untenable unthankful, untidy, untrainful, unvocal unwarlike unwakeful, unweary unwelcome unwomanly unworldly,* and the like (*b*) To past passive participles to indicate the absence of the condition or state expressed by the participle, as *unabashed, unabated, unaccented, unadorned unadulterated, unaided unaltered unanswered unappreciated, unarmed, unasked, unassisted, unattempted unattended, unbaptized, unbiased unbleached unbought, uncalled, uncaused unchanged, unchecked, uncheered, uncircumcised, unclouded uncompounded, unconfined, unconjugated, unconquered, unconstrained, uncultivated, undecided, undefended, undefiled, undeserved, undesigned undigested, undiminished, undimmed undisguised, undisturbed, undoubted, unemployed, unenlightened, unessayed, unexhausted, unexplained, unexplored, unfathomed, unforeseen, unfulfilled, unfurnished, unguarded, unguessed unharmed unheeded, unhelped, unhonored, unimpeached, unincloseed, uninhabited, uninspired unlearned, unlettered, unloved, unmarried, unmasked unmatched, unmingled, unmitigated, unmired, unmoved, unnerved unnoticed, unobserved, unobstructed, unornamented, unperceived, unpolished, unpractised, unpremeditated, unprepared, unprotected, unprovoked, unpunished, unread, unreconciled, unrefined, unrelated, unrepresented, unresisted unrewarded unsatisfied, unscathed, unsettled unshared, unsheltered, unshod, unshorn, unskilled, unsolicited, unsought, unstinted, unstudied, unsullied, unsurpassed, unsuspected, untasted, untaught, untempered untried untutored, unvaried, unverified, unwarranted, unwedded unwept, unwrought,* and the like (*c*) To present participles which come from intransitive verbs, or are themselves employed as adjectives, to mark the absence of the activity, disposition, or condition implied by the participle; as *unaccommodating, unaltering, unappreciating, unaspiring, unavailing, unblenching, uncalculating, unchanging, uncomplaining, unconsuming, uncontending, unconvincing, undeserving, undiminishing, undiscerning, undoubting, undreading, unedifying, unenduring, unenvying, unfading, unfaltering, unflinching, ungrudging, unheeding, unintercsting uninviting, unloving, unmoving, unobliging, unobserving unoffending, unpitying, unpleasing, unquarreling, unquestioning, unreplying, unrelating, unresting, unsearching unseeing, unshrinking, unsuspecting, unsympathizing, untrembling, unvarying, unwavering,* and the like This class of words is unlimited in extent, and such compounds may be formed by any writer or speaker at will, from almost all the adjectives or participles in the language, excepting those which have a recognized and usual negative correspondent with the prefix *in* No attempt will be made, therefore, to define them all in this Dictionary, many will be omitted from its vocabulary which are negations of the simple word, and are readily explained by prefixing a *not* to the latter Derivatives of these words in *-ly* and *-ness* will also, for the most part be omitted for the same or similar reasons There will be inserted as separate articles with definitions, only such as the following 1 Those which have acquired an opposing or contrary instead of a merely negative, meaning as *unfriendly, unmerciful, unpalatable, unquiet* and the like or else an intensive sense more than a prefixed *not* would express, as, *unending unparalleled undisciplined undoubted unsafe,* and the like 2 Those which have the value of independent words, inasmuch as the simple words are either not at all or rarely, or at least much less frequently used, as, *unavoidable unconscionable, undeniable, unspeakable, unprecedented unruly* and the like, or inasmuch as they are used in a different sense from the usual meaning of the primitive or especially in one of the significations of the latter as, *unaccountable unalloyed, unbelieving, unpretending, unreserved* and the like or inasmuch as they are in so frequent and familiar use that they are hardly felt to be of negative origin, as, *uncertain uncivil* and the like 3 Those which are of an anomalous and provincial character not desirable to be used, and so marked as, *unpure* for *impure unsatisfaction* for *dissatisfaction, unrepressible* for *irrepressible,* and the like

II *Un* is prefixed to a much smaller class, consisting of verbs to express the contrary, and not the simple negative, of the action indicated by the verb Their participles not unfrequently coincide in form with compounds of *un* with the participles or participial adjectives, as *undone,* from *undo,* meaning unfastened or ruined but *undone,* from *un* and *done,* means not done, unfinished

III *Un* is prefixed to a few nouns to express the absence or the contrary of that which the noun signifies, as, *unbelief, undress, unrest* and the like

Thou shalt put in the breastplate of judgment the *Urim* and the Thummim. *Ex* xxviii 30

And when Saul inquired of the Lord, the Lord answered him not, neither by dreams, nor by *Urim*, nor by prophets *1 Sam* xxviii 6

☞ There are two principal opinions respecting the *urim* and *thummim* One is, that these words denote the four rows of precious stones in the breastplate of the high-priest, and are so called from their brilliancy and perfection, which stones, in an appeal to God in difficult cases, indicated his mind and will by some supernatural appearance Thus, as we know that upon each of the stones was to be engraved the name of one of the sons of Jacob, it has been conjectured that the letters forming the divine response became in some way or other distinguished from the other letters The other principal opinion is, that the *urim* and *thummim* were two small oracular images similar to the teraphim, personifying revelation and truth, which were placed in the cavity or pouch formed by the folds of the breastplate, and which uttered oracles by a voice *Auto* The latest opinion is that of Professor Plumptre who supposes the *Urim* to have been a clear and colorless stone set in the breastplate of the high-priest as a symbol of light, answering to the mystic scarabæus in the pectoral plate of the ancient Egyptian priests, and that the *Thummim* was an image corresponding to that worn by the priestly judges of Egypt as a symbol of truth and purity of motive By gazing steadfastly on these, he may have been thrown into a mysterious, half ecstatic state, akin to hypnotism, in which he lost all personal consciousness, and received a spiritual illumination and insight — It is not known when this oracular mode of consulting God ceased There is no instance of it in the Scriptures, during the time of the first temple, and it certainly was not practiced during that of the second

4 Customary use, as of a word in a particular sense or signification, or the signification itself.

Syn. — Custom, use, habit — USAGE, CUSTOM These words, as here compared agree in expressing the idea of habitual practice, but a *custom* is not necessarily a *usage* A *custom* may belong to many or to a single individual A *usage* properly belongs to the great body of a people Hence we speak of *usage*, not of *custom*, as the law of language Again, a *custom* is merely that which has been *often* repeated, so as to have become, in a good degree, established A *usage* must be both often repeated and of *long standing* Hence, we speak of a "new *custom*," but not of a "new *usage*" Thus, also, the "*customs* of society" is not so strong an expression as the "*usages* of society" "*Custom*, a greater power than nature, seldom fails to make them worship." *Locke* "Of things once received and confirmed by use, long *usage* is a law sufficient" *Hooker*

Syn. — Employ — USE, EMPLOY We *use* a thing, or *make use* of it, when we derive from it some enjoyment or service We *employ* it when we turn that service into a particular channel We *use* words to express our general meaning, we *employ* certain technical terms in reference to a given subject To *make use of*, implies passivity in the thing, as, to *make use of* a pen; and hence there is often a material difference between the two words when applied to persons. To speak of "*making use* of another" generally implies a degrading idea, as if we had *used* him as a tool, while *employ* has no such sense. A confidential friend is *employed* to negotiate; an infamous agent is *made use of* to carry on an intrigue.

Ve lŏc'i ty, *n* [Fr *velocité*, Pr *velocitat*, Sp *velocidad*, Pg *velocidade*, It *velocità*, Lat *velocitas* from *velox*, *velocis*, swift, quick]

1 Quickness of motion, swiftness, speed, celerity, rapidity, as, the *velocity* of wind, the *velocity* of a planet or comet in its orbit or course, the *velocity* of a cannon ball, the *velocity* of light

☞ In such phrases, *velocity* is more generally used than *celerity* We apply *celerity* to animals, as, a horse or an ostrich runs with *celerity*, and a stream runs with *rapidity* or *velocity*, but bodies moving in the air or in ethereal space move with greater or less *velocity*, not *celerity* This usage is arbitrary, and perhaps not universal

2 (*Mech*) Rate of motion, the relation of motion to time, measured by the number of units of space passed over by the moving body in a unit of time, usually the number of feet in a second.

Initial velocity, the velocity of a moving body at starting, especially, the velocity of a projectile as it leaves the mouth of a fire-arm from which it is discharged —*Relative velocity*, the velocity with which a body approaches or recedes from another body whether both are moving or only one —*Uniform velocity*, velocity in which the same number of units of space are described in each successive unit of time. —*Variable velocity*, velocity in which the space described varies from instant to instant, either increasing or decreasing —in the former case called *accelerated velocity*, in the latter, *retarded velocity*; the acceleration or retardation itself being also either *uniform* or *variable* —*Virtual velocity* See VIRTUAL

☞ In *variable velocity*, the velocity, strictly, at any given instant, is the rate of motion at that instant, and is expressed by the units of space, which, if the velocity at that instant were continued uniform during a unit of time, would be described in the unit of time, thus, the velocity of a falling body at a given moment is the number of feet which, if the motion which the body has at that moment were continued uniformly for one second, it would pass through in the second The scientific sense of *velocity* differs from the popular sense in being applied to all rates of motion, however slow, while the latter has more or less reference to rapidity or quickness of motion

Syn.—Swiftness, celerity, rapidity, fleetness, speed

☞ This mode of torture is said to have been first employed in Germany, in the fourteenth century. The criminal was laid on a cart-wheel with his legs and arms extended and his limbs in that posture were fractured with an iron bar. In France, where its use was restricted to the most atrocious crimes, the criminal was first laid on a frame of wood in the form of a St. Andrew's cross with grooves cut transversely in it above and below the knees and elbows and the executioner struck eight blows with an iron bar, so as to break the limbs in those places, sometimes finishing by two or three blows on the chest or stomach, which usually put an end to the life of the criminal and were hence called *coups-de-grace* — blows of mercy. 1. The power of choosing, the faculty or endowment of the soul by which it is capable of choosing, the faculty of preferring or selecting one of two or more objects

It is necessary to form a distinct notion of what is meant by the word "volition" in order to understand the import of the word *will*, for this last word expresses the power of mind of which "volition" is the act *D Stewart*

Will is an ambiguous word, being sometimes put for the faculty of willing; sometimes for the act of that faculty, besides [having] other meanings But "volition" always signifies the act of willing, and nothing else *Reid*

Appetite is the *will's* solicitor, and the *will* is appetite's controller; what we covet according to the one, by the other we often reject *Hooker*

2 The choice which is made, a determination or preference which results from the act or exercise of the power of choice, a volition

The word *will*, however is not always used in this its proper acceptation, but is frequently substituted for 'volition,' as when I say that my hand moves in obedience to my *will* *D Stewart*

3 The choice or determination of one who has authority, a decree, a command, discretive pleasure.

Thy *will* be done *Matt* vi 10

Our prayers should be according to the *will* of God *Law*

4. Strong wish or inclination.

☞ "*Inclination* is another word with which *will* is frequently confounded Thus, when the apothecary says, in Romeo and Juliet,—

My poverty, but not my *will*, consents,
Take this and drink it off, the work is done,—

the word *will* is plainly used as synonymous with *inclination*, not in the strict logical sense, as the immediate antecedent of action It is with the same latitude that the word is used in common conversation, when we speak of doing a thing which duty prescribes, against one's own *will*, or when we speak of doing a thing *willingly* or *unwillingly*" *D Stewart*

5. That which is strongly wished or desired.

What is your *will*?
That he have his *Shak*
The wedding guest stood still

The mariner hath his *will* *Coleridge*

☞ Wills are *written*, or *nuncupative*, that is, oral

At will (*Law*), at pleasure To hold an estate *at the will* of another, is to enjoy the possession at his pleasure and be liable to be ousted at any time by the lessor or proprietor An estate *at will* is at the will of both parties — *Good will* (*a*) Favor, kindness (*b*) Right intention *Phil* i 15 (*Law*) See GOOD-WILL — *Ill will*, enmity, unfriendliness It expresses less than *malice* — *To have one's will*, to obtain what is desired — *Will-with-a-wisp*, a luminous appearance sometimes seen in the air over moist ground, supposed to proceed from hydrogen gas, Jack-with-a-lantern, ignis-fatuus — *Will-worship*, that kind of worship which is performed as a mere act of the will, and not spontaneously, formal worship [*Obs*] "That the Lord's day is an ordinary working day, it being *will-worship* and superstition to make it a Sabbath by virtue of the fourth commandment" *Fuller* — *Will-worshiper*, one who offers will-worship [*Obs*]

Will, *v. t* [*imp & p. p* WILLED; *p. pr. & vb. n* WILLING] [A-S *willan*, *willian*, *wilnian*, O Sax *willian*, *wellean*, O Fries. *willa*, *wella*, D. & L. Ger. *willen*, Goth *vilyan*, Icel & Sw. *vilja*, Dan. *ville*, O H. Ger. *wellan*, *willeon*, M. H. Ger. *wellen*, N. H. Ger. *wollen*, allied to Lat *velle*, *volo*, Gr. *βουλομαι*] This verb has both an irregular and regular form

1. Irregular. [*I will*, thou *wilt*, he *will*, *imp would*, *p p.* wanting.] (*a.*) To wish; to desire, to incline to have. "Caleb said to her, What *wilt* thou?" *Judg* i. 14. "They *would* none of my counsel" *Prov.* i. 30. (*b*) As an auxiliary, used to denote futurity dependent on the subject of the verb. Thus, in the first person, "I *will*" denotes willingness, consent, promise, and when "*will*" is emphasized, it denotes determination or fixed purpose, as, I *will* go, if you wish, I *will* go at all hazards In the second and third persons, the idea of distinct volition, wish, or purpose, is evanescent, and simple certainty is appropriately expressed, as, "You *will* go," or "He *will* go," describes a future event as a fact only. To emphasize *will* denotes (according to the tone or context) certain futurity or fixed determination

☞ As in *shall* (which see), the second and third persons may be virtually converted into the first, either by question or indirect statement, so as to receive the meaning which belongs to *will* in that person, thus "*Will* you go?" (answer, "I *will* go") asks assent, requests &c, while "*Will* he go?" simply inquires concerning futurity; thus also, "He says or thinks he *will* go, "You say or think you *will* go, both signify willingness or consent
